#### Outstanding Features

1. The tower crane is a combination of advanced technologies of the present day.
2. It is equipped with a hydraulic self-raising mechanism and a frequency-converting slewing mechanism.
3. The electric control system of the tower crane adopts the advanced "PLC + frequency converter" control mode of the present day, which has realized the stepless speed regulation and greatly improves the reliability, maneuverability and stability of the control system and the work efficiency of the tower crane.
4. The tower crane is equipped with all kinds of reliable safety devices, such as hoisting height limiter, slewing range limiter and multifunctional limiter to control the load moment, hoisting capacity and trolley traveling range.

#### Service

- a. Rapid response to any inquiry (within 3 hours) and 24 hours on-line service.
- b. Competitive price which directly work with factory. Welcome to visit us.
- c. Professional inspection department to guarantee quality.
- d. Engineers will go to construction site for guiding the installation and test-running for first time.
- e. Easy-worn Spare parts is free supplied along with the tower crane.
- f. 12 months super long time guarantee period.

#### Components

Tower cranes are used extensively in construction and other industry to hoist and move materials. There are many types of tower cranes. Although they are different in type, the main parts are the same, as follows:

Tower Crane Foundation  
 Tower Crane Mast Section  
 Tower Crane Climbing Frame  
 Tower Crane Table
