Feature

The gear rack is stable and hard to wear.

We adopt CNC machining to ensure high precision of products.

The location of the mounting hole can be customized according to your requirements.

Raw material use 60# steel, high strength and hardness.

The surface treatment is adopted spray painting or hot galvanizing, strong corrosion resistance and longer service life.

The gear is round and the rack is straight, and the two bite into each other to achieve movement, providing power assist for the hoist's climb.

The elevator rack is installed above the mast section, through the transmission system, combined with the gear, so as to achieve the lift up and down.
