Advantage

1. Mast section welded by welding Robot ensures reliable quality and elegant appearance.
2. All the steel structures are processed with blasting technology to remove rust. The adhesion of surface painting is outstanding.
3. Suspension cage guarding board adopts figured aluminum plate and numerical control punched aluminum plate. So that it is lightweight and artistic appearance.
4. Transmission mechanism supplied by the professional manufacturer has high efficiency, long service life and stability in performance.
5. Complete set of overload protection devices, variety of limiters and mechanical chain devices ensure its reliability. Anti-falling safety device adopts SAJ40-1.2, which restricts the excessive downward movement of the cage, preventing and eliminating accidents.
6. Frequency conversion construction elevator is safer, stable and comfortable. Starting electricity is smaller than working electricity, energy-saving and high efficient.
7. The hoist can be customized according to requirements (drawing, specifications and so on).
