Product Description

8 Ton Capacity Tower Crane with 60m Working Arm and 8000kg Hoisting Capacity EAC COC certificate

Product Description:

The Flat Top Tower Crane is powered by a 380V/50Hz power supply, which can be customized to meet the specific needs of the construction site. The main chord of the crane is 180*18mm, which ensures its strength and durability. The crane is available in two colors, yellow and green, to suit the preferences of the customer.

The crane comes with a PLC or frequency conversion control system, which ensures its smooth and efficient operation. The control system is easy to use, and the operator can control the crane with precision and accuracy. The crane also comes with a one-year warranty, which gives the customer peace of mind and ensures that any defects or malfunctions will be repaired free of charge.

Applications:

The Avit QTZ80 flat top tower crane is a high-quality product that is made in China. It is certified by EAC COC, ISO, and CE, ensuring that it meets international standards for quality and safety. This crane is a reliable choice for construction sites that require the lifting of heavy materials and equipment.

The crane is designed with a 180*18mm main chord and a 60m working arm, making it capable of lifting heavy loads to great heights. It is equipped with a VFD control system that ensures precise and efficient operation, and can be controlled using either a PLC or frequency conversion system.

The Avit QTZ80 flat top tower crane is suitable for a variety of applications and scenarios. It is ideal for construction projects that require the lifting of heavy materials and equipment, such as steel beams, concrete blocks, and precast panels. It can also be used for the installation of wind turbines, and for the construction of high-rise buildings.

The crane is particularly well-suited for use in Russia, where construction projects often require the lifting of heavy materials to great heights. Its 60m working arm allows it to reach even the tallest buildings, while its 3m mast section makes it easy to install and dismantle. The Avit QTZ80 flat top tower crane is available for purchase in sets of one or more. It is packaged in containers and can be delivered within 15-20 days of ordering. Payment terms include a 30% TT deposit and 70% payment before delivery. The crane comes with a one-year warranty, ensuring that buyers can rely on it for years to come. With a supply ability of 30 sets per month, the Avit QTZ80 is a reliable and cost-effective choice for construction sites around the world.

Customization:

Our product customization services for the Avit Flat Top Tower Crane QTZ80 includes packaging details in containers, with a minimum order quantity of 1 set and a delivery time of 15-20 days. Payment terms are 30% TT deposit and 70% before delivery, and we have a supply ability of 30 sets per month.

For customized needs, please feel free to contact us. We provide tailored solutions to meet your specific requirements, especially for customers in Russia.

Packing and Shipping:

Product Packaging:

The Flat Top Tower Crane will be securely packed in a wooden crate to prevent any damages during transportation. Each component of the crane will be individually wrapped and labeled for easy identification and assembly. Instruction manuals and safety guidelines will be included in the package.

Product Shipping:

The Flat Top Tower Crane will be shipped via a reliable and reputable shipping company.

The shipping cost will be calculated based on the destination and weight of the package.

The estimated delivery time will be provided to the customer upon shipment.

The customer will receive a tracking number to monitor the shipment status.
